Associate Information Systems Officer

Duty station: Valencia, Spain

Contract type: International ICA

Contract level: IICA-1

Duration: Open-ended

Application period: 18-Mar-2019 to 09-Apr-2019

The position is located in Valencia, Spain. This is a position in UNOPS for supporting projects carried out for the United Nations Secretariat and located in the United Nations Enterprise Application Centre- Bangkok (EAC – BKK). The incumbent of this position will be a consultant of UNOPS under its full responsibility.

The incumbent gathers user requirements, prepares relevant documentation, configures SAP Material Management (MM) module, program using ABAP, participate in quality assurance and deployment activities.

Functional Responsibilities

With the direction of a senior developer the incumbent is expected to undertake the following duties:

- Drafts functional specifications and implements detailed technical specifications based on the functional requirements; assists in providing integrations with other systems
- Writes and designs programs and reports in SAP ABAP to meet the technical specifications, particularly in Materials Management (MM) and Financial Accounting (FI) modules;
- Works on a portal for the SAP procure-to-pay process;
- Contributes to the project by identifying software gaps, proposing FRICEW items, performing unit testing, integration testing, defect resolution, training support and production support.
- Participates in field deployment and training
- Performs other duties as required

Monitoring and Progress Controls

- In coordination with the team lead and senior developers, the incumbent is to monitor the progress and assure the on-time deliveries of assigned technical artifacts and documents
- The incumbent is expected to exercise flexibility in dynamically changing delivery requirements

Education

- A Bachelor's degree in computer science, information systems, mathematics, statistics or related field is *required*.

Work Experience

- Minimum 2 years of progressively responsible experience in information systems analysis, programming, systems administration and maintenance, software development is *required* or a holder of a Bachelor's degree in the relevant fields.
- A Master's degree may substitute for some of the required years of experience.
- Work experience in SAP development, SAP configuration, or SAP quality assurance is *highly desirable*.
- Hands-on technical experience in at least 4 of these technologies is *highly desirable*: SAP Materials Management (MM), SAP Human Capital Management (HCM), SAP Employee Self-Service (ESS), SAP Manager Self-Service (MSS), Oracle Database, SAP Query, SAP Quick Viewer, ABAP, SQL, CRM Integration.
- Knowledge of Linux, UN application architecture, or integration with Siebel and other standard platforms is *desirable*.

c. Language Requirements
- Fluency in written and oral English is *required*.
- Knowledge of another United Nations official language is *an advantage*.
