

Senior/Software Developer Analyst

We are looking for a dynamic person to join our technology team that can actively contribute to the development of a clinical trial management system and to the full corporate digitalization within the biotechnological and pharmaceutical sector.

The technological ecosystem is based on:

- K2 version 5 Business Process Management System, code less 3rd party solution
- Microsoft Azure virtual machines in an IAAS architecture
- SQL Server 2017 as a business database
- C# code as WCF services to integrate K2 with Microsoft Graph to manage Office 365 Sharepoint
- Sharepoint Online, sites and document libraries
- Azure DevOps Services – Agile Framework
- Git

The person who will join the team should have knowledge of database design and programming, and good programming skills.

Background:

- Telecommunication or Computer Science Engineer Graduate or similar

Nice to have skills

- C#, WCF or REST
- MVC framework & .Net Core
- Microsoft SQL Server
- Transact SQL, DAX
- Power BI
- GIT
- Azure DevOps Services, Pipelines, Jenkins, Builds
- K2 or other Business Process Management systems experience
- Graph or any integration with Sharepoint
- Application User management with Azure Active Directory experience

Location

Madrid, headquarters
