■ **Knowledge and additional and specific experience to be assessed (30 points, all contributions must be documented).**

At the time of assessing the submitted applications, experience in some of the following fields related to the research areas of the Project will also be taken into account, but it is not necessary to have experience in all of them:

- Numerical methods for solving ordinary differential equations and in partial derivatives.
- Knowledge of modelling of physical processes in the energy field. In particular, modelling and numerical simulation of fluids.
- Numerical methods in optimization.
- Programming in scientific calculation languages (Python, Fortran, C, C ++, etc.).

■ **Personal interview and letters of recommendation (30 points).**

Candidates achieving the best assessments according to the above criteria will be called to a personal interview and a test related to the functions of the position. In this third phase, the letters of recommendation that arrive for the candidate will be taken into account; only three letters of recommendation per candidate will be accepted, which must be sent directly by the person issuing the report and not the candidate himself. At least the three best rated candidates will be interviewed and between the two previous sections have reached at least 35 points.
